

**.22 Long Rifle Ammunition Velocities**

Collected by: Ed Skinner [ed@flat5.net](mailto:ed@flat5.net) <http://flat5.net/>  
 Revised: 03/04/05

Values in italics are computed from other values herein.

Performance data was collected at the "Information Source" shown.

I cannot vouch for the accuracy of these numbers other than my attempt to make an accurate transcription thereof.

Where possible (and they are noted as such), velocities are those stated by the manufacturer.

Standards of measurement observed by measurers, if any, are unknown.

Where two velocities are available but not otherwise described, it is assumed herein that they are "Rifle Muzzle" and "Rifle 100 Yard" velocities.

Where only one velocity figure is available but not otherwise described by the information source, it is assumed to be the "Rifle Muzzle" velocity.

Handgun figures are bold-faced (and may appear in columns labelled otherwise). [See Eley Pistol Standard (turquoise box), for example.]

It is highly likely that pistols will impart a lower velocity to the bullet than the rifle velocities shown below.

It is extremely unlikely that your gun will have the same performance shown herein.

Manufacturer	Brand	Bullet	Bullet Wt. (grns)	Muzzle Vel. (ft/sec)	Vel. at 100 yds or 50 M (ft/sec)	Muzzle Vel. (ft/sec)	Derate	Velocity	Information Source

**.22 Long Rifle Ammunition Velocities**

Collected by: Ed Skinner [ed@flat5.net](mailto:ed@flat5.net) <http://flat5.net/>  
 Revised: 03/04/05

Values in italics are computed from other values herein.

Performance data was collected at the "Information Source" shown.

I cannot vouch for the accuracy of these numbers other than my attempt to make an accurate transcription thereof.

Where possible (and they are noted as such), velocities are those stated by the manufacturer.

Standards of measurement observed by measurers, if any, are unknown.

Where two velocities are available but not otherwise described, it is assumed herein that they are "Rifle Muzzle" and "Rifle 100 Yard" velocities.

Where only one velocity figure is available but not otherwise described by the information source, it is assumed to be the "Rifle Muzzle" velocity.

Handgun figures are bold-faced (and may appear in columns labelled otherwise). [See Eley Pistol Standard (turquoise box), for example.]

It is highly likely that pistols will impart a lower velocity to the bullet than the rifle velocities shown below.

It is extremely unlikely that your gun will have the same performance shown herein.
