

3X Optical Extender

Part No.	28311-200
Length	9.2cm / 3.7"
Diameter	10.4cm / 4"
Weight	15 oz
F/#	1.2
Mount	Lever lock

A ruggedized optical extender designed for use with the M-18. This quick mount extender increases operating range by a factor of 3 with significant improvement in image resolution. The front lens features a diamond like coating to ensure durability under harsh environments. The Detection range with extender is in excess of 2,000 meters for a moving man-sized target. It is easily installed with a lever locked mating ring that easily attaches to the M-18. Focus is achieved by simply turning the extender left/right using the knurled hard rubber hand ring.
